After care for the baby

- 1) The care for your baby is very simple.
- 2) You are going to prepare the gauze pad with some ointment to place over the Bris area. Therefore wash your hands well.
- 3) Carefully rip the paper envelope that contains the gauze pad near the edge and remove the gauze pad. (The next step only works with Johnson and Johnson brand of First Aid Gauze} Holding the gauze at the top, rip the gauze pad in two. Place one half back into the envelope.
- 4) Squeeze some Bacitracin ointment onto the gauze pad, and smear it around, not with your finger, but rather, by folding over the pad which will "shmeat" the ointment.
- 5) Place the gauze pad over the Bris area, and slightly squeeze the edges of the gauze pad, thereby creating an envelope-like covering to Bris.
- 6) Continue this from right after the Bris until twenty four hours after the bandage is off.
- 7) Call if anything bothers you at any time. Even three o'clock in the morning!!
- 8) My phone number is Dade 305-651-BRIS (2747) and my cell number is 305-519-6643
